Garibaldi, the legend....

Ricardo Tormo, World Champion 80 cc

Isabel Garibaldi con Benjamín Grau

Garibaldi – Designed for Riders, Inspired by the Mediterranean

At Garibaldi, we promote the use of motorbikes and scooters as essential tools for daily mobility—whether for work or leisure. Now more than ever, moving freely is a necessity, and we believe a helmet shouldn't be seen as a luxury, but as a dependable partner. For those who ride every day, it's about safety, convenience, and embracing the unique, indescribable feeling of two-wheeled freedom.

Our products are **Designed in Barcelona**, created in collaboration with talented Spanish and Italian designers. This is our way of paying tribute to our name—Garibaldi—rooted in Italian heritage and carried forward in our identity. All of our collections are developed at our headquarters in the heart of Barcelona, just a 10-minute walk from its stunning beaches. A city full of life and creativity, Barcelona inspires every product we create.

This Designed in Barcelona approach blends Mediterranean creativity with strict quality standards. The result? Apparel and helmets that reflect a true Mediterranean identity—stylish, functional, and built to last.

A Vision in Every Product

Each product in our range reflects our design philosophy: delivering exceptional value, high-quality craftsmanship, and meeting the everyday needs of modern riders. Our red four-leaf clover logo symbolizes good luck and loyalty—values that define our relationship with you. We aim to be your most trusted motorcycle brand—always reliable, never letting you down.

Our Legacy: From Track to Street Since 1972

Garibaldi has been crafting motorcycle garments, gloves, and accessories since 1972. The company was **founded by Josep Maria Guillaumet and Isabel Garibaldi**, who began by hand-making racing leather suits and protective gear in their Igualada (Barcelona) workshop. Legendary riders such as Ricardo Tormo, Sito Pons, Jorge Martínez Aspar, Àlex Crivillé, Alex Barros, Carlos Checa, Sete Gibernau, Toni Elías, Dani Pedrosa, Jordi Tarrés, Marc Colomer, and Carlos Mas chose Garibaldi—many becoming World Champions. In fact, our gear has contributed to **18 world titles**.

In those early years, countless Spanish riders wore their first leather suit thanks to Isabel Garibaldi, a pioneer and the soul of the company. Her handmade suits opened doors for young talent and earned her the love and respect of the entire racing community.

Pleased to protect you!

Innovation Inspired by Tradition

Today, Garibaldi is known for the exceptional quality of its gloves—especially **heated gloves** and **Primaloft® models**—and our advanced textile jackets. Our iconic **Heritage Jacket** is a standout piece, crafted in **Wax Cotton Look fabric**, a modern evolution of the original Spanish waxed cotton Barbour-style jacket developed by Isabel and her husband. They adapted it with British inspiration and gave it a distinctly Garibaldi identity.

For over four decades, we proudly represented **Nolangroup in Spain** as exclusive distributors of their helmets. This meaningful partnership lasted until 2019, when we made the bold decision to launch our own helmet line: **GARI**, short for Garibaldi. Drawing on our extensive experience, this new line represents the perfect blend of safety, innovation, and design.

Our **first open-face Gari helmets** launched in summer 2020, followed by **full-face** and **flip-up models** in 2021. Designed to match perfectly with Garibaldi apparel, Gari helmets are the result of decades of industry expertise and passion.

A Family Spirit Moving Forward

Today, the company is led by a united and experienced team. Since 2008, **Georgina Guillaumet Garibaldi**, daughter of the founders, has guided Garibaldi with a clear mission: to achieve excellence in every detail and promote a culture rooted in quality. We are constantly searching for the best materials and suppliers to ensure maximum safety, style, and performance—while always delivering excellent value for money.

G11

The G11 is an ECE 22.06 approved demi-jet helmet well-fitted to every size thanks to its particular shell design and inner lining. It captivates you at first sight for the originality of its colours both its outer shell and inner lining. Lightweight outer shell made of thermoplastic resin and 1100 gr +/- 50 gr weight. Dual-density, high impact-absorbing EPS inner shell for a better fit to each size. Strap with micrometric closure -Quick Release System- with a red puller. Long scratch-proof treated visor with "2 Component" pins offering a perfect fit to the Pinlock® lens, sold as an optional spare part. Removable and

washable breathable hypo-allergenic microfibre inner lining with Aero 3D mesh inserts in elegant brown tobacco colour, perfect match for every outer shell colour. Visor mechanism with the same colour of every outer shell. Washable and detachable cheek pads customized to every outer shell size offering ample and comfortable space around the ears. Rivet with a four-leaf clover logo. Space around the ears to mount Bluetooth speakers. 4 glossy colours, pearl black, pearl white, nardo grey and classical british green and 2 matt, blue and ochre, all of them being a perfect match to the exclusivity of the tobacco brown lining. Sizes: XS to XXL.

G20

Practical and comfortable, it is the perfect ally for the city riding. It features durable construction and is versatile thanks to its different elements that can be mounted according to specific needs: the G20 can be used with both the screen and the sunvisor or with only the sunvisor, resulting in a classic retro styling. Overview and specs: 2 outer shells made of thermoplastic resin for a better fit to small and large sizes. Inner shell with differentiated density EPS. Wide and clear injected screen that covers below chin level, is adjustable to 3 positions, has anti-scratch treatment and offers UV protection. it is Pinlock® prepared, an anti-fog lens can thus be mounted comfortably whenever necessary. Quick Release System: mechanism for removing and substituting the screen

quickly and without tools by turning on and off the mechanism cover plate. Practical built in solar visor with anti-scratch treatment easily operable from outside. This smoke Sun Visor control allows operation of the sun visor by pulling up/down the handle on the left side of the helmet. Comfort inner fabric fully removable, washable and breathable and inserts in Aero mesh. It features an innovative, thermoformed Luxury design which reduces the seams. Shell with rubber edging. Micrometric Quick Release closure system to ensure an adjustable, comfortable fit. Strap with anti-irritant underchin fastener. Space around the ears to mount Bluetooth speakers. Metal ring to hook the helmet to the vehicle. Helmet homologated in accordance with the latest 22.06 european regulation.

G21

Diseño aerodinámico y moderno, el G21 es el nuevo casco jet para aquellos a quienes les gusta el estilo café racer y buscan un casco perfecto a juego con su moto y outfit. Incorpora un mecanismo que no requiere de ningún desmontaje para insertar o extraer la pantalla, visor solar y pantalla preparada para Pinlock. Características técnicas: Calota exterior fabricada en ABS de tamaño reducido. Calota interna en EPS de multi densidad para una óptima absorción de los impactos y un óptimo ajuste a cada talla. Amplia pantalla de policarbonato con tratamiento antirayas y protección UV que cubre por debajo del nivel de la barbilla. Mecanismo que no requiere desmontaje para la substitución de la pantalla.

Práctico Sun Visor con tratamiento antirayas. Acolchado interior pre-formado con corte láser para una excelente ergonomía e inserciones en malla, totalmente desmontable y lavable. Dispone de un innovador diseño Luxury termoformado que reduce las costuras. Bordón de goma negra en la calota. Cierre micrométrico rápido y fácil de usar. Correa con pasante de barbilla anti-irritación. Espacio específico en la calota interior para colocar un intercomunicador Bluetooth. Casco homologado de acuerdo con las regulaciones europeas ECE 22.06. Colores: negro mate con logo rojo, blanco perla, gris nardo y café mate con reflejos dorado. Tallas: XS a XXL.

GO2x

Fiberglass

A sharp, retro styled fiberglass shell helmet with contrast color lining, the GO2X is an open face helmet that extends down to provide full coverage of the ears and stands out for its lightweight, fit and comfort. With its retro look, it is characterized by providing a shell with a clean and rounded shape. Designed for use with goggles, it has only a small logotype on the goggle strap holder in back. A clean and rounded shape with vintage details. It boosts snaps buttons and can also be equipped with a peak and a face shield. The peak is included in the box and the face shield is sold separately.

Overview and specs: 100% multi-composite fibre in various layers for a shock absorbent shell with optimum rigidity. 4 outer shell sizes (XS-S, M, L and XL-XXL) for a better fit to

each size. High impact absorption, multi-density EPS inner shell with the same 4 different densities which afford greater impact absorption. Padded interior finished in comfortable eco-leather, soft fabric and embossed logo. Different colour paddings (black, dark brown and wineberry) depending on the shell colour. Detachable and washable cheek pads. Shell with metallic or rubber edging, depending on the outer colour shell. Micrometric closure and Quick release system to ensure an adjustable, comfortable fit. Strap with anti-irritant underchin fastener. Metal ring to hook the helmet to the vehicle. Space around the ears to mount Bluetooth speakers. Helmet homologated in accordance with the latest 22.06 european regulation.

G03x

Fiberglass

The new vintage styled shell helmet with different contrast color linings, the G03X is an open face helmet that stands out for its modern and exclusive touch. The streamlined shape of the shell is inspired by the timeless "retro" look, while presenting clean and modern lines. Ideal for urban scooter use it boasts an smoke antiscratch screen adjustable to 3 positions and with rounded edges as well as one handle to lower it. 100% multi-composite fibre in various layers for a shock absorbent shell with optimum rigidity and resulting in a weight as low as 1 Kg. 3 outer shell sizes (XS-S-M, L and XL-XXL) for a better fit to each size. High impact absorption, multi-density EPS inner shell with different densities which afford greater impact absorption. Padded interior finished in comfortable eco-leather, soft

fabric and embossed logo. Variety of colour combinations for the inner padding and shell with different colour paddings (black, brown and wineberry) depending on the shell colour. Detachable and washable cheek pads. The entire helmet has a rubber edging to protect it from day to day use and improve the joint between the shell and the padding. Micrometric closure and Quick release system to ensure an adjustable, comfortable fit. Strap with anti-irritant underchin fastener. Designed for use with goggles with tape, the helmet has got a rear strap holder with push button to move the tape glasses. Metal ring to hook the helmet to the vehicle. Space around the ears to mount Bluetooth speakers. Helmet homologated in accordance with the ECE European regulations.

G40

sunvisor

Sleek, modern looking and functional jet helmet that provides an excellent protection. It boasts a sun visor, a wide and long screen and a very comfortable interior padding as well as the inner space to install a Bluetooth system and the Easy-Fit Glasses groove. Overview and specs: Outer shell made of light-weight thermoplastic resin (1.300 gr. +/- 50 gr) and 2 outer shell measures for a better fit to each size. Internal multiple density polystyrene. Wide and long injected screen that covers below chin level, has anti-scratch treatment and offers UV protection. Quick Release System: mechanism for removing and substituting the screen quickly and without tools. Practical built in solar visor with anti-scratch treatment easily operable from outside. This smoke Sun Visor control allows operation of the sun visor by pulling up/down the handle on the left side of the

helmet. Advanced ventilation channelling system: all the air flow is conducted from the front to the back, expelling the heat and humidity outside. With air inlets in the upper zone and fully integrated air exhausts in the rear area to draw moisture and warm air from the interior of the helmet. Comfort inner fabric fully removable, washable and breathable and inserts in Aero mesh. It features an innovative, thermoformed Luxury design which reduces the seams. Shell with rubber edging. Micrometric Quick Release closure system to ensure an adjustable, comfortable fit. Strap with anti-irritant underchin padding. Easy-Fit Glasses groove where you can insert your glasses conveniently and ample space around the ears to mount Bluetooth speakers. Helmet homologated in accordance with the latest 22.06 ECE European regulations.

GO7x

Fiberglass

Light weight fiberglass composite helmet (1300G+/-50G) with a clean silhouette, the GO7X is a retro inspired full-face that offers comfort and style for everyday use. 2 outer shells for a customized fit. 2 EPS inner shells made of a particular pressed polystyrene that is allocated at a differentiated density depending on the area (top, side, main and chin) and which allows an excellent response in the event of an impact by dispersing the energy released evenly. Closing block of the visor specifically designed and positioned on the chin guard, a detail usually present in racing helmets. 3mm anti-scratch visor traditional visor system. Ventilation system, which consists of three elements: a large air intake on the front, one on the chin guard and the extractor

in the back. The interiors are made of breathable materials and are hypoallergenic. Contoured cheek pads, removable and washable. There are different colour paddings (black, dark brown and wineberry) depending on the shell colour. To make driving even more comfortable, the padding has been arranged in such a way as to obtain sufficient space for driving with prescription lenses. To overcome the problem of fogging in case of temperature changes, it is Pinlock® prepared, an anti-fog lens can thus be mounted comfortably whenever necessary. Padded chin strap with the most secure fastener, the D-Ring closure. Homologated ECE R22-06, it requires a more stringent test process than the previous ECE R22-05 approval and provides more impact points, as well as an oblique test to measure the rotation of the helmet.

G80

Trend

The G80 combines cutting-edge design with features for a fresh vented full-face with maximized ventilation. Made of lightweight thermoplastic resin shell (1450+-g), this helmet exhibits weight management. Internal multiple density polystyrene. Polycarbonate screen with anti-scratch treatment and coated with anti UV layer. The helmet's glass is adapted to the Pinlock® anti-fogging system and the Pinlock® shield is included in the box. Quick Release System: mechanism for removing and substituting the screen quickly and without tools. Practical built in solar visor with anti-scratch treatment easily operable from outside. This smoke Sun Visor Control allows operation of the sun visor by pulling up/down the handle on the left side of the helmet by an external drive mechanism. Removable and washable interior padding so that

it is always clean and fresh as new. Efficient ventilation system made up of a chin bar air intake, one upper air intake and two rear air exhausts integrated into the rear spoiler to offer optimum internal cooling. Engineered to accommodate riders that are wearing glasses thanks to the presence of a glasses groove where you can insert your eyeglasses conveniently. Micrometric Quick Release closure system to ensure an adjustable, comfortable fit. Strap with anti-irritant underchin fastener. Ample space around the ears to mount Bluetooth speakers. Breath Deflector redirects air coming out of the mouth to prevent visor fogging up. While visor is open, deflector makes breathing easier. Chin curtain reduces the amount of air flowing through the helmet via the chin area. Helmet homologated in accordance with the ECE european regulations.

Lightweight full-face helmet made of fiber composite that boasts peculiar safety elements such as the Emergency Pull and the DD Rings closure. It is characterized for its lightness, sleek aesthetics and comfort and designed for those traveling on the road. The helmet is produced with 2 sizes of shell for a better fit to each size and with 3 EPS caps. Polycarbonate screen with anti-scratch treatment and coated with anti UV layer. The helmet's glass is adapted to the Pinlock[®] anti-fogging system and the Pinlock[®] shield is included in the box. Quick Release System: mechanism for removing and substituting the screen quickly and without tools. Practical built in solar visor with anti-scratch treatment easily operable from outside. Efficient ventilation system made up of a chin bar air intake, one front air intake, two upper air

intakes and two air exhausts integrated into the rear spoiler. Removable and washable interior padding made of breathable, moisture-wicking and hypoallergenic bamboo that keeps facial skin blemish-free. Engineered to accommodate riders that are wearing glasses thanks to the presence of a glasses groove where you can insert your eyeglasses conveniently. Emergency release system of the side padding which allows rescue personnel to remove the pillows pads from the helmet, simply by pulling the red ribbons or tabs. Retention system with double rings (Double DD Ring). Inner Ear Pads speaker pockets. Breath Deflector redirects air coming out of the mouth to prevent visor fogging up. Chin curtain reduces the amount of air flowing through the helmet via the chin area.

G90x
Classic

G91X

FIBER

After the popular G90X, Garibaldi brings a new lightweight full-face helmet made of fiberglass, the 91X Fiber, designed to comply with the latest ECE 22.06 regulation. It boasts peculiar safety elements such as the Emergency Pull and the DD Rings closure as well as includes a customized Pinlock® 70 in the box. It is characterized for its lightness (small shell 1.400 gr +-), sleek aesthetics and comfort and designed for those traveling on the road and the city. The helmet is produced with 2 sizes of outer shell different EPS caps for a better fit to each size. Polycarbonate screen with anti-scratch treatment, UV layer and 4 different positions. Quick Release System: mechanism for removing and substituting the screen quickly and without tools. Built in solar visor with anti-scratch treatment operable from the bottom of the helmet by an external drive mechanism. Efficient ventilation system made up of a chin bar air intake, an upper air intake and an integrated

rear spoiler to offer optimum internal cooling. The spoiler is larger in the Sport version, a better fit for sportive users needs. Removable and washable interior padding made of breathable, moisture-wicking and hypoallergenic fabric that keeps facial skin blemish-free. Engineered to accommodate riders that are wearing glasses thanks to the presence of a glasses groove where you can insert your eyeglasses conveniently. Emergency release system of the side padding which allows rescue personnel to remove the pillows' pads from the helmet, simply by pulling the red ribbons or tabs and to do it while the helmet's still being worn. Ample space around the ears to mount Bluetooth speakers. Breath Deflector redirects air coming out of the mouth to prevent visor fogging up. Chin curtain reduces the amount of air flowing through the helmet.

G100

Trend

The G100 is the Garibaldi flip-up with dual P/J homologation for riding in total safety with the helmet closed, in full face mode as well as with the helmet open in jet mode. Aperture system with just one hand avoiding accidental opening of the chin bar. With a built-in sun visor, comfort padding and incorporating a Pinlock® anti-fog lens, it is ideal for touring and urban use. Overview and specs: 2 outer shells made of thermoplastic resin for a better fit to small and large sizes. 2 EPS inner shells. Efficient ventilation system formed by 2 adjustable air inlets in the upper area and one in the chin bar as well as air exhausts fully integrated into the rear area of the helmet. Polycarbonate screen with anti-scratch treatment and coated with anti-UV layer. It incorporates in the box a Pinlock® shield to prevent fogging of the screen. Quick Release System: mechanism for removing and substituting the screen quickly

and without tools. Practical built-in smoke solar visor with anti-scratch treatment easily operable from the bottom left of the helmet. The inner sun visor offers a wide visual field and great peripheral vision to reduce eye fatigue. Removable and washable interior padding so that it is always clean and fresh as new. Engineered to accommodate riders that are wearing glasses thanks to the presence of a glasses groove where you can insert your eyeglasses conveniently. Micrometric Quick Release closure system to ensure an adjustable, comfortable fit. Strap with anti-irritant underchin fastener. Ample space around the ears to mount Bluetooth speakers. Breath Deflector redirects air coming out of the mouth to prevent visor fogging up. While visor is open, deflector makes breathing easier. Chin curtain reduces the amount of air flowing through the helmet via the chin area. Metal ring to hook the helmet to the vehicle. Helmet homologated in accordance with the latest 22-06 ECE European regulations.

G110

Adventure

The G110 is a Touring Adventure Flip-up helmet. Practical and versatile, it can be used with a peak (visor) attached or converted into a standard flip-up helmet by removing the peak. Thanks to its ECE 22.06 with dual P/J certification, it can also be used in a closed position as a full-face helmet for long trips or with the flipped up chinbar converted into an open-face for the hottest days. Its exterior color schemes and interior liner design make it visually appealing.

Lightweight shell made of thermoplastic material, weighing 1750g 50g in "M" size. 3 Dual-Density EPS liners, different-sized inner shells with dual-density foam for superior impact absorption and a perfect fit for all head

shapes. Quick-Release System equipped with a micrometric buckle (with a red pull tab) for fast release. Anti-Scratch screen boasting "2-Component Pin" mechanism for precise adjustment of the optional Pinlock® 70 anti-fog insert. Comfortable Liner made of breathable, hypoallergenic microfiber with Aero 3D mesh for ventilation—removable and washable. Ergonomic Design with size-specific ear-pads, removable, and washable, ensuring a spacious and comfortable fit. Bluetooth headset mounting space for easy communication system integration. Available Colors: white with red details, glossy grey with fluor details, matt black with red details and matt sand with red details. Sizes: XS to XXL. their names and designs on the shell. Helmet homologated in accordance with the latest 22.06 ECE European regulations.
